

ESTHETIC SALON SANITARY RULES

State Form 51332 (5-03)

State Board Of Cosmetology Examiners

1. An esthetician shall:

- (a) Keep floors, walls and furniture clean and sanitary at all times, pursuant to 820 IAC 3-2-5.
- (b) Clean thoroughly and sanitized immediately after each use facial bowls and facial sinks, pursuant to 820 IAC 3-2-6(b).
- (c) At all times while serving a customer, wear a clean, washable outer garment, pursuant to 820 IAC 3-2-7(a).
- (d) Use clean towel, linen and headband for each customer, pursuant to 820 IAC 3-2-8(a).
- (e) Properly sanitize all instruments, pursuant to 820 IAC 3-2-9(a).
- (f) Wash hands in fresh water and germicidal soap (*antimicrobial*) immediately before serving each customer, pursuant to 820 IAC 3-2-9(c)(1).
- (g) Wear latex gloves which must be disposed after use during the service of one (1) customer, when extracting blackheads, mila or comedones, pursuant to 820 IAC 3-2-9(c)(2).
- (h) Use clean coverings for the chair and table where a customer is receiving esthetician services, pursuant to 820 IAC 3-2-9(d).
- (i) Use a clean secured draping between the esthetician and customer during an esthetics session, pursuant to 820 IAC 3-2-9(e).
- (j) Dispose of all disposable items after serving each customer, pursuant to 820 IAC 3-2-9(f).
- (k) Use spatulas in dispensing all products, pursuant to 820 IAC 3-2-9(g).
- (l) Dispose lancets in a lancet safety device (*waste container*), pursuant to 820 IAC 3-2-9(h).

2. Sterilization shall be as follows:

- (a) Instruments shall be washed in a low residue detergent and rinsed prior to sterilization, pursuant to 820 IAC 3-2-9(b)(1).
- (b) Instruments shall be cleaned by cold sterilization using an effective disinfectant, used according to manufacturer's instructions, pursuant to 820 IAC 3-2-9(b)(2).
- (c) High frequency wands shall be cleaned using an effective disinfectant, used according to manufacturer's instructions, pursuant to 820 IAC 3-2-9(b)(3).
- (d) Forceps, tweezers, and comedone extractors shall be sterilized using a steam autoclave, pursuant to 820 IAC 3-2-9(b)(4).
- (e) All instruments other than those under subdivision (4) shall be sterilized by means of a disinfectant, steam autoclave, or a dry heat sterilizer, pursuant to 820 IAC 3-2-9(b)(5).
- (f) Sterilization shall be accomplished by placing instruments in one (1) or all of the following, pursuant to 820 IAC 3-2-9(b)(6):
 - (1) A cold sterilizer using an effective disinfectant, according to manufacturer's instructions.
 - (2) A steam autoclave sterilizer in which the instruments are subjected to saturated steam of the pressure of fifteen (15) pounds per square inch for thirty (30) minutes at two hundred fifty (250) degrees Fahrenheit.
 - (3) A dry heat sterilizer in which instruments are heated for two (2) hours to three hundred forty (340) degrees Fahrenheit.

RULES SHALL BE POSTED IN A CONSPICUOUS PLACE IN SALON
